## PLANVIEW ENTERPRISE ON DEMAND

### Get Comprehensive Portfolio Management with Fast Implementation and Short Time to Value with the Planview SAAS Delivery Model

When facing increased expectations coupled with diminishing resources, IT executives have to find more innovative and flexible ways to enable business productivity. Look to Planview Enterprise On Demand, the Software-as-a-Service (SaaS) approach to portfolio management, to meet the need.

Now, you can leverage the comprehensive portfolio management capabilities of Planview Enterprise without dedicating time and resources to internal application infrastructure configuration and management. With Planview Enterprise On Demand, you get the robust features of an enterprise-scale deployment, with fast implementation and short time to value.

### The ‘What You Need, When and the Way You Need It’ Solution

No matter your organization size or process maturity level, you will realize portfolio management benefits quickly, to drive maximum value from projects, services, and products with negligible impact on infrastructure and budget.

The scalable solution grows with your needs, so you can take full advantage of the market’s most comprehensive resource, demand, and financial management tools over time.

Your organization will realize:

- **Accelerated time to value.** Your organization can quickly and easily access the functionality of Planview Enterprise, enabling you to realize value from your investment faster.
- **Reduced costs.** The SaaS model greatly minimizes up-front and ongoing management costs, allowing you to benefit from reduced hardware, software, and human expenses.
- **Scalable infrastructure.** As your needs increase, you can add more hardware and storage on demand without a large, up-front investment.
- **Organizational flexibility.** You’ll have the flexibility to shift budgets, resources, and personnel from IT service maintenance activities to higher-priority initiatives.

#### *Why is now the time for Planview Enterprise On Demand?*

*According to Gartner, the time is right for organizations to look at SaaS PPM solutions as a viable alternative – in economic downturns, driving maximum value from work is more critical than ever. Plus, effective SaaS PPM systems fit well into risk mitigation strategy.*

### The Features of Planview Enterprise On Demand

The quality and commitment to your satisfaction for which Planview is recognized is illustrated in Planview Enterprise On Demand with features including:

**Around-the-clock availability.** Your users just need a Web browser to access all the benefits of Planview software. Access is available 24/7, and the hosted solution is maintained with continuous systems monitors to ensure consistent availability.

**Expert service and support.** Turnkey technical support is delivered via the Planview expert service team, and includes systems management, scheduled backups, database optimization, seamless upgrades and patches, with data archive and recovery services.

**State-of-the-art equipment and partners.** Planview Enterprise On Demand features an advanced virtualized infrastructure, high-end server hardware, database management software, firewall protection, data storage services, and malware protection. In addition, you benefit from the Planview® relationship with world-class server and co-location partners for unbeatable reliability and performance.

**Secure solutions.** Your data is vital, so Planview Enterprise On Demand provides the highest possible level of security for all users. SSL Encryption protocols guarantee data encryption, password protection, and the security of your data.

**Competitive pricing.** Planview offers competitive pricing with a simple model based on the total number of Planview users. The initial setup and monthly fees include everything that you need to get started.
